PRODUCT DATA SHEET

ECOPOL-CL17
Zirconium Based Gel Activator

GENERAL INFORMATION:
ECOPOL-CL17 is a highly efficient and cost-effective zirconium based gel activator for fracturing fluids, particularly those based on CMHPG, but also effective for guar and HPG based fluids. It is effective at temperatures up to 400°F and at a pH range of 4-11.

PHYSICAL PROPERTIES:
pH = 4.5-6.5  Appearance = Colorless to yellow liquid
Solubility in water = Soluble  Flash point = >200°F
Odor = Mild  Freeze point = 12°F
Specific Gravity = 1.2

CHEMICAL DESCRIPTION:
ECOPOL-CL17 is an aqueous zirconium oxychloride based gel activator.

RECOMMENDED USES:
ECOPOL-CL17 can be used for a wide variety to fluid systems and a broad range of temperatures. ECOPOL-CL17 is fully compatible to all common breaker systems.

TREATING APPLICATIONS:
ECOPOL-CL17 is typically added on the fly, at loading of about 0.5-1.0 Gallons/1000 Gallons of fracturing fluid at pH of 4.0-11.0. Typical gel loadings range from 20-50 lbs/1000 Gallons. A pH of about 4.0-11.0 can be achieved by Econo Buffer-L or Econo Buffer-H. ECOPOL-CL17 will crosslink instantly at a pH above 9.0, but will have a delay below a pH of 9.0. Pilot testing is strongly recommended.

ECOPOL-CL17 is available in 55 Gallon drums and 264 and 317 Gallon poly totes.
