PRODUCT DATA SHEET

ECOPOL-LRS
Anti-Sludge Acid Additive

DESCRIPTION
Ecopol-LRS is a highly effective anti-sludge agent that prevents the formation of iron/asphaltene sludge build-up. Ecopol-LRS contains nonionic surfactants which deliver superior break times normally within 60 seconds depending upon crude oil characteristics. Ecopol-LRS provides an extremely low surface tension that helps to prevent sludging even in very difficult cases.

PRODUCT ADVANTAGES
Ecopol-LRS is designed to have excellent compatibility with other acidizing compounds such as corrosion inhibitors, iron control agents, and various non-emulsifiers. Ecopol-LRS is designed to be a highly effective nonionic non-emulsifier where in many cases an additional non-emulsifier would not be necessary.

CHEMICAL & PHYSICAL PROPERTIES
Appearance: Pale Yellow Liquid
Specific Gravity: 0.85
Appearance/Odor: Alcohol
Ionic Charge: Non-Ionic
Surface Tension @ 1 gpt: 25 dynes/cm²

TYPICAL USAGE
Ecopol-LRS is designed to be formulated in hydrochloric acid at a 1-5 gpt loading for anti-sludge purposes and is designed for use where high concentrations of anionic compounds might be detrimental. Ecopol-LRS offers a very cost effective and high quality alternative compared to other products.

Please read and understand the Material Safety Data Sheet (MSDS) before using this product.
