Technical Data Sheet

GENERAL INFORMATION

POLY FOAMER is a concentrated, high-foaming liquid surface-active agent designed for air, mist, or foam drilling applications, including water wells, shot holes, and mineral exploration holes. It is readily soluble in fresh or salt water, offering exceptional performance in various drilling conditions. This biodegradable and non-polluting agent ensures minimal environmental impact while delivering superior foam stability.

PRODUCT BENEFITS

- Prevents sticking and balling of cuttings, improving drilling efficiency.
- Facilitates the removal of water and cuttings from the borehole.
- Reduces air volume requirements, optimizing compressor performance.
- Lowers compressor pressure, leading to increased penetration rates.
- Performs effectively in fresh, hard, or saltwater environments.
- Suppresses dust, enhancing site safety and visibility.
- Provides highly stable foam, making it one of the most effective foaming agents available.
- Non-irritating upon external contact, ensuring user safety.
- Biodegradable and non-polluting, leaving no lasting foaming material in streams or other waters.

RECOMMENDED USAGE

Mix POLY FOAMER with injection water in concentrations ranging from 1 pint to 2 quarts per 50 gallons of water, depending on drilling conditions and desired foam volume. Adjust the dosage to achieve optimal foam consistency and performance.

PRODUCT PACKAGING

POLY FOAMER is available in 5-gallon plastic containers and 55-gallon steel drums.
