

PRODUCT DATA SHEET

ECONO-FR-C42

CATIONIC FRICTION REDUCER ADDITIVE

GENERAL INFORMATION

Econo-FR-C42 is a high molecular weight cationic copolymer. This product is designed to enhance the water displacement in oil wells by considerably reducing the friction pressure experienced at very high flow rates.

PRINCIPLE USES

Econo-FR-C42 is an effective friction reducer whenever a cationic polymer is desired. Econo-FR-C42 is especially useful in acids or brine waters, where anionic polymers tend to lose their effectiveness.

PROPERTIES

Appearance	Opaque, off white emulsion
Specific Gravity	1.04
Viscosity	1200 cps
Ionic Charge:	Cationic
Freezing Point	~0°F

FEEDING AND DOSAGE

Recommended use levels are 0.5-1.0gal/1000gal in water. This product should not be used neat.

STORAGE

Econo-FR-C42 should be stored between 30-90°F and protected from freezing. If freezing occurs the product should be warmed to 30-90°F and mixed well before use.

PACKAGING

Econo-FR-C42 is available in 264 gallons totes, 317 gallon totes or bulk.
